

‘BRIDGING THE DIVIDE: EQUAL EDUCATION FOR ALL ’

This was a truly ground-breaking conference, ideated and organized by me from conception stage six months ago to the actual event in October, 2024. The idea came from my observations on how different the quality of schooling and opportunities available were for students in rural areas as compared to those in cities. ‘ Bridging the Divide’ brought together delegations of students from cities and villages to discuss collaboration methods and ideas for change. Delegations from Uttar Pradesh and Odisha schools attended this conference. There were extremely dynamic presentations and discussions on the way ahead. This was the first step towards laying a bridge of understanding between urban and rural students and I am very happy, it will now be an annual conference in my school. In a small way, I contributed to the beginning of a crucial conversation.
